Learning to Learn: The Next Step

Learning to Learn: The Next Step describes a Return to Study course that helped many adults in Melbourne's Western suburbs become highly capable tertiary students in the 90's. The course was designed for adults who had an incomplete, little or unsatisfactory secondary education. The premise of the course is that learning to read and write academic discourse is not about following rules but learning to participate in distinctive cultures. It makes the conventions, norms and practices of that culture explicit to students so as to help them to successfully perform in that culture.

Each unit includes detailed lesson descriptions for the teachers, sequenced student reading and writing activities, and rationales for the activities it describes.

A wide range of vocabulary is the key to good results in **IELTS**, and developing this is an important part of exam preparation. Students often worry about low-frequency technical or specialised terminology, while ignoring words that they are likely to meet and need again and again in academic discourse. In the Longman Exams Dictionary these words are clearly marked and students will find full and accessible information about their form, meaning and use, which will help them to deal with IELTS academic reading and listening tasks more confidently. In addition, the support materials on CD-Rom will help students to activate this vocabulary and build up a solid base of academic English, enabling them to convey precise meanings within all the main IELTS topic areas, fluently and flexibly in both writing and speaking tasks.
