

1.0 GENERAL INFORMATION

The BikeBANDIT™ is a low cost high performance Motorcycle Security System which provides you with instant direct communications with your vehicle at all times allowing you to track it and take control of it using any wireline touch tone phone, mobile phone or Personal Computer from anywhere in the world.

The BikeBANDIT™ allows you to locate and control your vehicle using either

1. A standard Voice call
2. SMS messaging commands
3. ON-Line via a PC, Modem and BikeBANDIT™ PC Application Software

The BikeBANDIT™ continually monitors the following Functions

- Emergency PANIC Button
- Ignition Detection Input
- Kick Stand
- Main Power Input
- Tow Away Detection
- Overspeed Detection
- Black Box Recorder

The BikeBANDIT™ talks to you in a friendly female voice in your own language.

The Voice menu allows you to

- Find out your Vehicle's GPS Co-ordinates, Position Speed and Heading
- Listen to a Status Report
- Control the Alarm System
- Flash The Headlight or Beep the Horn
- Disable the Vehicle
- Set your Home Base Position
- Set your Intruder and Emergency Phone Numbers
- Set your PIN Number

The BikeBANDIT™ can automatically dialout up to 4 Phone Numbers.

2 Voice Call Numbers and 2 SMS Numbers

All BikeBANDIT™ Functions and Phone Numbers can be easily Setup using a simple SMS Messages

The BikeBANDIT™ requires a GSM SIM Card, not supplied, with Voice and SMS Phone Number and optional Data Call Number if the user requires access via a PC and Modem.

The BikeBANDIT™ is a Personal Monitoring System so there are NO Third Party fees to pay unlike many Back To Base Systems which require you to pay ongoing fees for many years costing typically many thousands of dollars. Your BikeBANDIT™ belongs to you.

Your BikeBANDIT™ will operate in any country with compatible GSM Network and SIM Cards.

Full functionality is best achieved in areas with both GSM Network Service and GPS satellite broadcast signal. Wide open outdoor areas are ideal for the GPS satellite receiver. GPS receivers can suffer interference from transmitting devices which may cause dropouts in GPS coverage but this is generally uncommon and more likely in large commercial centres. The BikeBANDIT™ will continue operating without either service necessarily available. If the GPS is unavailable the BikeBANDIT™ will remember the last position with GPS service available and provide you with that information.

The purpose of this manual is to provide you with the most important information to allow the best operation and performance for your BikeBANDIT™. Please take the time to thoroughly read all the information provided.

It is Important for you to also become familiar with all operational aspects of the monitoring system.

The specifications presented herein should be used for guidance only and are subject to change without notice.
