Introducing the Evo Flattop Grills

Cooking outdoors is a delight. Everyone agrees. Now the Evo evolution brings outdoor cooking to new spectacular heights: seared whole salmon, smoked two-inch pork chops, or sausage and egg breakfasts with French toast and warm maple syrup.

This versatility comes from Evo's patented flattop cooking surface. It's the first outdoor grill to allow for simultaneous direct and indirect cooking. Cooking directly, you can sear, sauté, grill, toast and stir-fry. Indirectly, you can boil, braise, poach or fry. And by covering the cook surface with its stainless steel hood, Evo becomes a patio oven for roasting, steaming, warming or smoking. No other appliance lets you be this creative outdoors.

Evo Professional & Affinity 30G Grills

The Evo Professional & Affinity Grills have a 30" (760mm) cooking surface available in ceramic coated steel with two independently controlled burners for a combined rating of 35.5MJ/h. The Professional model is available in either cart or tabletop configuration. The Affinity 30G is a built-in style.

Evo Companion Grill

The Evo Companion Grill has a 25" (635mm) ceramic coated steel cooking surface and a single defused burner operating at 32.5MJ/h. It is available in either cart or tabletop configuration.
