SCEPTER FUEL CONTAINERS

Scepter developed The First Plastic Jerry Can, setting the standards for the industry. Since the original appeared in 1959, Scepter have continued to refine it as new technology made improvements possible. Made from High Density Polyethylene, the Lightweight, Crushproof Design has extra Headspace built in to accommodate expansion. A vent and a reversible spout make pouring safe and easy, and the sight-line shows how much fuel is left. The can is rustproof, unbreakable & non-corroding. The cans meet or exceed Australian Standards.

Tuff Cut offers a comprehensive range of spare parts for the Outdoor Power Equipment Market.

Tuff Cut spares are precision engineered fast moving parts designed for our Tuff Australian conditions and come in attractive, eye catching and space saving packaging.

From lawnmower blade & bolt packs to the Tuff premium, quality trimmer line, there is a product to cover your customers needs.

Tuff Cut mower blades are precision made in Australia using Australian BHP steel. Tuff Cuts Australian blade manufacturer is the only AS3902 supplier in Australia .

All Tuff Cut blades are subject to stringent quality control procedures and are heat treated and tested in Australia
(important to remember when considering cheap imported products & public liability.)
