

fischertechnik New 2014

ADVANCED Tractor Set IR Control

7 years & up/ 540
Parts/ 8 Models

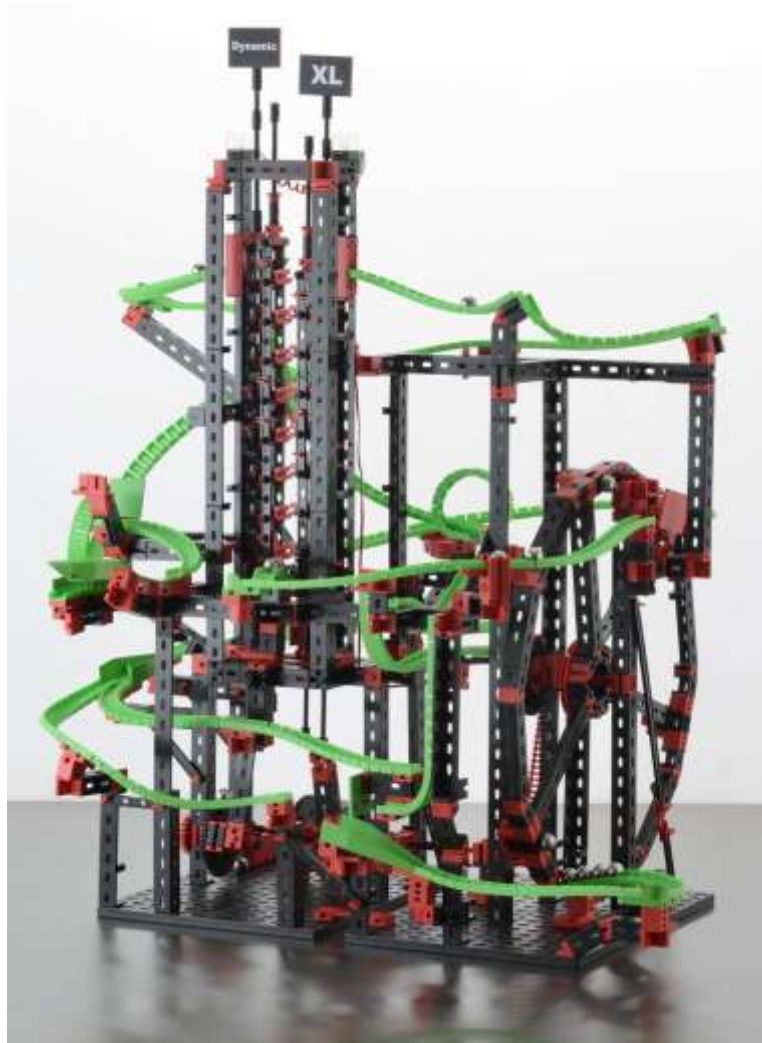

Complete set with proportional 4-channel infrared remote control, servo-steering, powerful gear motor and battery tray. Over 540 parts allow construction of a tractor with 7 working attachments. The rotary mower, double rotary windrower and hay turner are driven by a rotating power take-off. A harrow, two-way plow, cable winch and pusher plate offer further features for more fun. The speed of the gear motor, the angle of the servo-steering and two additional motors (not included) are all designed for infinite control. Inc. play figure!

- Includes: IR remote control, receiver, servo-steering, gear motor and battery holder for 9V battery.
- Ideal add-ons: Motor Set XS (505281), Sound+Lights (500880), Accu Set (34969)
- Models: 8; Components: 540

Part. No.: 524325

PROFI Electronics

**9 years & up/
260 Parts/ 12
Models**

Simple circuits, series and parallel connections, electronic circuits with transistors, capacitors, resistors and LED lights. Step by step, this construction set teaches the basic principles of electronics. The electronic module, a control with 8 fixed programs, has 2 motor outputs, 3 analog inputs for sensors and potentiometers for controlling the speed of the motor. Many fascinating as well as functional models can be built with this construction set, from a simple flash light to amusement park see-saw, alternating flasher and automatic ventilating fan.

- Incl. electronic module, XS motor, 2 x transistors, 2 x capacitors, 3 x resistors, 2 x mini-switches, phototransistor, temperature sensor, lens tip lamp, 2 x LED lights and battery holder for 9V battery.
- Incl. instructional activity booklet explaining the principles of operation.
